INDUSTRIES™

To align with the 3R's of the LEA 2018 Conference, the NSW Chapter seeks to provide opportunities to learn from the threads of reflection, relevance and revolution in real situations.

The LEA NSW Chapter warmly invites you to St Luke's Catholic College ...

St Luke's Catholic College is an exciting and thriving school which is designing a new normal for learners aged 3 to 18 years of age. Staff and parents work as partners to nurture faith filled curious children to become creative contributors and innovative problem solvers for a changing world.

During the event, you will hear from Greg Whitby, Executive Director of Catholic Education, Diocese of Parramatta; Principal, Greg Miller, Architect, David Bryant from Alleanza Architecture. You will also be able to tour the site.

St Luke's opened in February 2017 and Greg Miller is the foundation principal. The College commenced with pre-school and primary years and is now progressed to Stage 5 (Year 8).

Strategic master planning continues to be critical to the success of the College as it moves through to Stage 6 (Years 11 & 12) in coming years. Project Director, Paul Bryant will outline the process to masterplan a site for a school that will eventually accommodate 2000 students from Early Years through to Stage 6.

The design is intended to break down hierarchies and provide tangible connections between learners. An innovative approach to pedagogy is being pursued by the Diocese and this is reflected in how the school interfaces with the community both in the physical and virtual realm.
